

INFORMATION SHEET

Age Group: **Children / Adolescents and Young Adults**

Sheet Title: **Teachers Aids (Summary)**

Because every child with Asperger's Syndrome is unique, there is no fool-proof list of strategies that will work for everyone.

We recommend "*Breaking Down Barriers to Learning*" and "*Teaching Students with Autism*". Web links to both of these documents can be found on our web site.

Asperger's Syndrome is characterised by difficulty with four main areas:

- Social interaction
- Communication
- Imagination (e.g. imagining what others are thinking)
- Sensory sensitivity (e.g. to bright lights, noises, textures, tastes, touch & smells)
